PROFESSIONAL SUMMARY

B.Tech Computer Science graduate specializing in Artificial Intelligence and Machine Learning. Proficient in Python, SQL, Machine Learning, Deep Learning, Data Analytics, and NLP, with hands-on experience in data preprocessing, exploratory data analysis (EDA), predictive modeling, and data visualization. Passionate about building data-driven AI solutions to solve real-world problems and drive business value..

SKILLS

- **Programming & Libraries:** Python, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow
- **Machine Learning & Deep Learning:** ML Algorithms, ANN, CNN, Hyperparameter Tuning, Feature Engineering, EDA (Exploratory Data Analysis), Model Evaluation
- **Generative AI:** Large Language Models (LLMs), LangChain, Retrieval Augmented Generation (RAG)
- **Data Tools:** SQL, Microsoft Power BI, FastAPI, Git, Jupyter Notebook

EXPERIENCE

AI/ML Engineer – GraphicWeave (1 year, Hybrid):

May 2025—May 2026

- Contributed to the development and deployment of a BERT-powered fake review detection platform using Python, TensorFlow, and FastAPI, achieving 96% recall and reducing false positives by 8%.
- Developed and deployed AI-powered machine learning solutions using Python, TensorFlow, Scikit-learn, SQL, and FastAPI, performing data preprocessing, feature engineering, model training, and performance evaluation across NLP and predictive analytics projects.

AI/ML Intern – Techboxx (4 months, Onsite):

Jan 2025—April 2025

- Built an AI-Powered Student Mentoring Intelligence System using Python, Scikit-learn, Pandas, FastAPI, and K-Means clustering, integrating rule-based risk scoring, student segmentation, and cosine similarity-based mentor matching.
- Used Jupyter Notebooks to perform exploratory data analysis on 3+ datasets, improving experiment reproducibility and analysis clarity.

PROJECTS

- **YouTube Transcript Intelligence Bot:** designed and implemented a YouTube bot using LangChain with RAG architecture for intelligent transcript retrieval and LLM-based question answering.
- **Fake hotel review prediction** – developed a BERT-based NLP pipeline with an SVM classifier for deceptive hotel review detection, achieving 92% precision, and deployed the model as an API using FastAPI for real-time inference.
- **Cat-dog image classification (CNN)** – built and trained a convolutional neural network with TensorFlow, classifying 10,000 images with 95% accuracy on the test set.

EDUCATION

BTech CSE – University of Kashmir, North Campus – Baramulla

Aug 2022 – July 2026

CGPA – 8.12/10

High School – Tyndale Biscoe School – Srinagar

2021

CERTIFICATIONS

- **Machine Learning A-Z: Hands-On Python in Data Science** – Udemy. 2025
- **Machine Learning Specialization** – DeepLearning.AI – Coursera. 2025
- **Power BI Workshop** – Skill Nation. 2025
- **AI/ML Workshop** – National Institute of Technology, Srinagar. 2024
